

July 10, 2013

Dear Speaker Boehner, Senate Majority Leader Reid, and Members of the United States Congress:

As evangelical scientists and academics, we understand climate change is real and action is urgently needed. All of God's Creation - humans and our environment - is groaning under the weight of our uncontrolled use of fossil fuels, bringing on a warming planet, melting ice, and rising seas. The negative consequences and burdens of a changing climate will fall disproportionately on those whom Jesus called "the least of these": the poor, vulnerable, and oppressed. Our nation has entrusted you with political power; we plead with you to lead on this issue and enact policies this year that will protect our climate and help us all to be better stewards of Creation.

Average global temperatures are at their highest level within the measurement record, and we are beginning to see indications of increasingly disturbed weather. For example, 2012 was the hottest year ever recorded for the contiguous United States, and it will go down as one of the most destructive and disruptive years in U.S. history: wildfires, drought, superstorms, and public health outbreaks. This past year is only one example of the patterns of change we expect to see as the climate warms globally. We're already spending billions in emergency aid for the victims of hurricanes and weather disasters, and these expenses will only increase as the "once in a lifetime" storms become the new normal.

The Bible tells us that "love does no harm to its neighbor" (Romans 13:10), yet the way we live now harms our neighbors, both locally and globally. For the world's poorest people, climate change means dried-up wells in Africa, floods in Asia that wash away crops and homes, wildfires in the U.S. and Russia, loss of villages and food species in the Arctic, environmental refugees, and disease. Our changing climate threatens the health, security, and well-being of millions of people who are made in God's image. The threat to future generations and global prosperity means we can no longer afford complacency and endless debate. We as a society risk being counted among "those who destroy the earth" (Revelation 11:18).

We call on you to pass meaningful legislation during this Congress to reduce carbon emissions and protect our environment, thereby strengthening the long-term outlook for our economy and our children. As Christian scientists and educators, we offer our knowledge, experience, and prayerful witness to assist you and all of our nation's leaders who are willing to address this urgent challenge.

Sincerely,
